Portfolio
São Paulo, Brazil · Remote

Brazilian Portuguese language professional with **10+ years of translation and language-quality experience**, supported by formal training in Portuguese and English Languages and Literatures, linguistics, applied language studies, and translation. Experienced in evaluating meaning, accuracy, register, tone, terminology, coherence, cultural fit, and instruction-specific requirements across audiovisual, academic, legal, technical, and digital content. Brings a structured, evidence-based approach to quality review: comparing alternatives against explicit criteria, identifying omissions and unsupported claims, and documenting clear rationales. Portfolio includes independent demonstrations of **AI response evaluation**, comparative response ranking, Brazilian Portuguese localization, and linguistic reasoning. Native Brazilian Portuguese; advanced English.

CORE EXPERTISE

AI Response Evaluation

- Comparative response evaluation and ranking
- Factual accuracy and evidence checking
- Reasoning and internal consistency
- Instruction adherence and completeness
- Concise written rationales
- Identifying omissions and unsupported conclusions

Linguistics & Brazilian Portuguese

- Grammar, syntax, semantics and pragmatics
- Discourse, register, tone and style
- Idiomaticity and natural language use
- Terminology and consistency
- Cultural and contextual appropriateness
- Portuguese and English language analysis

Quality Review & Research

- Linguistic QA and translation review
- Error identification and categorization
- Rubric-based evaluation
- Style-guide and criteria compliance
- Editorial standards and quality checklists
- Academic, legal and technical content

PROFESSIONAL EXPERIENCE

Freelance Translator, Linguistic Reviewer & Subtitle Specialist

2015–Present

International clients and language service providers

- Translate and review English-to-Brazilian Portuguese content, preserving **meaning, nuance, register, communicative intent, and idiomatic expression**.
- Assess linguistic accuracy, fluency, terminology, consistency, completeness, contextual suitability, and compliance with client instructions and style guides.
- Review audiovisual scripts, dialogue, documentaries, films, series, interviews, educational material, and digital content, balancing close reading with audience and genre expectations.
- Identify mistranslations, omissions, additions, ambiguity, inconsistent terminology, awkward phrasing, and formatting or segmentation problems; provide corrections and actionable feedback.
- Work independently with source material, reference documents, glossaries, and detailed project instructions, managing deadlines in remote international workflows.

Audiovisual Translator / Linguistic QC

Project-based; selected work since 2022

Vox Mundi, Moshi Media, VSI and other localization projects

- Translate and quality-check large volumes of audiovisual material, including **10,000+ minutes across translation and QC workflows** in selected projects.
- Compare localized text with source audio, scripts, templates, and client requirements to detect accuracy, omission, consistency, timing, segmentation, and readability issues.
- Apply project-specific language guidelines and terminology, documenting problems clearly and escalating source/template issues when needed.
- Adapt dialogue and culturally specific references for Brazilian audiences while retaining the source's intent, tone, and level of intensity.

Localization QA & Language Quality Specialist

Selected projects

Acclaro and multilingual localization workflows

- Review localized content against source material, terminology, style guides, and client-specific quality standards.
- Assess accuracy, fluency, terminology, consistency, locale appropriateness, and MTPE output; record linguistic and formatting issues with clear explanations.
- Collaborate with translators, reviewers, and project teams to resolve quality issues and maintain consistency across deliverables.

Content Governance & Linguistic QA

2020–Present

TeamWorker · Enterprise telecommunications content

- Supported linguistic quality and editorial standards across a large-scale content ecosystem.
- Created and maintained style guides, terminology resources, editorial standards, quality checklists, and documentation workflows.
- Reviewed Portuguese content for linguistic accuracy, consistency, terminology, formatting, and usability; coordinated issue resolution with writers, editors, and process stakeholders.
- Worked with structured content and decision-tree-guided information, checking whether content follows the relevant logic, includes required conditions, and supports its conclusions.

Translator · Legal, Technical & Academic Content

Selected projects

Tikinet and independent translation projects

- Translated and reviewed legal, technical, and academic materials, with attention to terminological precision, argument structure, register, and preservation of meaning.
- Applied close reading and contextual interpretation to content where wording, qualification, and conceptual distinctions affect the meaning of the text.

SELECTED PORTFOLIO DEMONSTRATIONS

> **Comparative AI Response Evaluation — Brazilian Portuguese**
> Independent portfolio demonstration comparing two fluent answers to a grammar prompt. Uses explicit criteria for accuracy, reasoning, instruction adherence, clarity, and consistency; ranks the responses and provides an evidence-based written rationale. Demonstrates a repeatable evaluation process, not prior paid AI-training experience.

> **When Correct Portuguese Is Not the Most Appropriate Portuguese**
> Independent localization case study comparing a literal translation with a context-sensitive version for Brazilian young professionals. Explains how audience, register, tone, idiomaticity, and product context affect quality, while recognizing that the best choice depends on the intended use.

> **Structured Content, Decision Logic & Quality Workflows**
> Transferable-skills demonstration connecting editorial governance and decision-tree content to response evaluation: checking constraints, missing conditions, terminology consistency, logical progression, and whether conclusions are supported by the available information.

Portfolio samples are independent demonstrations and are not client deliverables.
